

# Reasons to invest in concrete pieces by Dade-Design

Each unit that leaves our plant in Switzerland is a true piece of **Swiss precision**. We mix our high-strength fibre concrete by hand and employ our own mould maker who has mastered his craft from the bottom up. This combination enables us to produce **unique pieces with a "millimetre guarantee"** and a pore-free, visibly even surface. Our concrete is able to resist acid contact for up to 12 hours thanks to the **Dade coating**. This development provides an unrivalled surface appearance and feel; whilst providing a reliable finish practical for daily use.

Dade-Design is your one-stop provider of unique concrete pieces. You can obtain everything from a single supplier:

- Planning
- 3D visualisations
- Design consultation & advice
- Bespoke Moulding
- Installation ready cast products
- Logistic arrangements
- Installation
- Reliable Swiss precision and quality
- Unique pieces in concrete

## Our History

At the very beginning, Andy Keel, founder of dade-design sought a concrete bathtub for his own apartment. Discovering the limitations of the available options fuelled his vision of making concrete a material that's truly fit for use in the kitchen and bathroom. Today dade-design is the leading Swiss manufacturer of designs in concrete and a true pioneer in the development of new high-end applications for concrete. In essence we firmly believe that our concrete works!
