

dade kitchen fronts - concrete panels 13mm

description

There are many materials that look like concrete- but not all of them are made from solid concrete. Our 13mm dade FRONT is made from real concrete with A1 finish on the front, back and sides. This is a real alternative to ceramic fronts.

The raw material is perfect for processors (natural stone & kitchen fabricators) and can be purchased in 2. 25 x 1. 0m slabs directly from us. (palletized/un-coated, raw size 2. 44 x 1. 2m)

Dade also offers ready assembled cabinets with concrete fronts as a finished product. Together with the kitchen worktops, this creates a complete concrete kitchen. The edges of the FRONT are machined by CNC and a made-to-measure joint pattern is achieved. The invisible dade coating is applied, which makes the fronts dirt-repellent and acid-resistant.

The worktop material is **not** suitable as a kitchen worktop.

dimensions

length : 2250mm
width : 1000mm
thickness : 13mm

weight

ca. 44kg

concrete technology

High-performance concrete dade-roc with fibres and carbon reinforcement. The texture of the surfaces is subject to natural fluctuation. Small pores and streaks, small holes and gaps as well as colour deviations or fine shrinkage cracks are not grounds for complaint, but - like knotholes and annual rings in wood - are part of the unique appearance of the material. (see also our AGB's and maintenance instructions)

tolerance

thickness: +/- 1,5mm auf 1m

special features

colours natural grey

Custom made Dade-design specializes in unique concrete products. We will be happy to cut the front panels to your individual dimensions.

dade coating Approx. 150g of coating is required per panel. You are welcome to purchase our dade PU coating together with the panel material. Also available are 2K adhesives for assembly.
