

dade *ELINA* washstand furniture

dade ELINA 60, open at the bottom

dade ELINA 60

dade ELINA 60 with dade ELEMENT 60

In line with the dade concrete washbasin collections, a matching piece of furniture was developed – the **dade ELINA**. The washstand designed by the dade architects originates from a collaboration with Timberline and is available in three sizes. Black MDF contrasts perfectly with the grey of the concrete basin – the design is sober – the workmanship of high quality. The 15cm high drawers hit on the cover plate and reflect the design of the 15cm high concrete washbasins. The washstand is available with a single drawer and an open compartment for towels etc. or two drawers. dade ELINA is 40cm deep and available in widths of 60, 90 or 120cm.

Product features

Drawer types	Blum Legrabox (standard), Blum Legrabox with concrete sides or solid wood drawers.
Materialization of the corpus	Nut veneer or MDF black (other materials on request). All dade ELINA washstand units can also be finished in a concrete look.
Connection	Cut-outs for siphons are planned individually
Maintenance	Please note our maintenance instructions

Versions

In the dade ELINA 90 washstand unit the base of the dade ELINA 90 washstand unit is made of black MDF or walnut veneer. This body is covered by the extra-thin dade FRONT made of concrete, giving it a distinctive character. In addition to the 15cm high drawers reaching across the entire width of the washstand, more storage space is located behind two revolving doors on the lower part.

Combined with the dade CUNEO 90, dade CASSA 90 or dade ELEMENT 90, the sober block of concrete acts as an eye-catcher in the bathroom.
